

VIDUN HERATH

Phone: +61 490 171 095 | Email: vidunhr@gmail.com | Residence: Rowville, VIC

Software Development student with a deep passion for full-stack development and building innovative solutions. I have a strong foundation in applying modern technologies, backed by hands-on experience in collaboration and consulting within team environments.

EDUCATION

Monash University

Feb 2024 - Present

Bachelor of Information Technology - 73.963WAM

- **Areas of Study:** Software Development (Major) & Cybersecurity (Minor).
- **Related Coursework:** Cybersecurity tools and techniques, Full stack development, Databases, Operating systems.

SKILLS

Programming Languages: JavaScript/TypeScript, Python, Java, C++, SQL, PHP, Kotlin, HTML, CSS.

Frameworks & Libraries: React, Angular, Node.js, Express, Cake PHP, Jetpack Compose, Unreal Engine.

Cloud, DevOps & Databases: AWS, GCP, Cloudflare, MongoDB, Elasticsearch, Firebase, Supabase, Docker, Linux/Bash, Git.

Design & Tools: Figma, Adobe Creative Cloud, Microsoft 365.

Soft Skills & Languages: Fluent English, Technical Communication, Team Collaboration, Active Listening.

PROJECTS

Dwllr.ai | MACATHON 2026 Entry

Apr 2026

React, Vite, Supabase, FastAPI, Vercel, GCP, Google AI Studio

- Led the front-end development and UI design in a team of four, building a tenant app and landlord portal using Vite and React with a strong focus on visual clarity, accessibility, and consistent interactions.
- Designed an intuitive "swipe" interface and onboarding flow, turning complex AI matching data into a simple, people-first experience that helps tenants easily find compatible housemates.
- Connected the front end to a FastAPI backend to handle real-time user profiles and property listings.

StaySafe | UNIHACK 2026 Entry

Mar 2026

React, Vite, R, Supabase, Vercel

- Collaborated in a team of 5 to develop an interactive web app within 2 days that visualises predicted crime risks across Victoria.
- Led backend integration by engineering a Supabase database to process and serve ML crime predictions, infrastructure data, and user-submitted incident reports.
- Mapped complex geospatial datasets and predictive models onto interactive Leaflet map layers within the React application.

StudentShop | Personal Project

Sep 2025 - Dec 2025

MongoDB, Angular, Node.js, Elasticsearch, Firebase, PayPal, ZooKeeper, OpenAI Platform

- Designed a note-sharing platform enabling high school students to upload and sell their own PDF notes, or browse and purchase notes from peers.
- Built a responsive Angular frontend with Firebase authentication and Socket.io for dynamic UI updates.
- Engineered a Node.js and Express backend, integrating MongoDB and Elasticsearch for fast, user curated search results.
- Programmed an automated OpenAI moderation system, reliably managing concurrent background tasks using ZooKeeper.
- Integrated client and server side PayPal SDKs to securely process checkout transactions and student payouts.

EXPERIENCE

Retail Volunteer | Australian Red Cross Shop

Mar 2026 - Present

- Welcomed and assisted shoppers at the register, handled daily transactions, and kept the store tidy and inviting for the local community.
- Sorted through incoming clothing donations, carefully inspecting items for quality before pricing and preparing them for the shop floor.

Monash Innovation Guarantee (MIG)

Jan 2026 - Feb 2026

- Participated in an interdisciplinary team of 6 to address a critical challenge for Victoria's Essential Services Commission.
- Developed and pitched a strategic framework on how retailers can leverage AI to identify customers affected by family violence, ensuring they receive support and retailers meet regulatory obligations.

Process Worker | Trajan Scientific and Medical

May 2024 - Jul 2024

- Conducted quality control testing on medical equipment, inspecting glass components for defects such as chips to ensure compliance with manufacturing standards.
- Built foundational skills in production processes, quality awareness and workplace safety.
